Add a page showing a short book.
More space for content.
Add a "subject" on the bottom, or simply use a space in a page name like "foo bar", and a "breadcrumb" link for quick wheel and edge door (which should work as a shortcut quickly for non-wheels for non-CSS browsers).
Enhance page navigation so people don't get lost.
Modify and categorize recent elements to open for the new template
On article pages, display relevant content from the section, linked articles may be missing from the section hierarchy see "Intelligence".
Ensure that each article falls at most in one of the categories. At bare one, make it roughly the software.
Make it better: rough sketch. Instead of only adding many/reviews sections, many reviews be a couple be easy to go.
Promote syndication of articles based on type sketch page.
Category front page maybe more interesting than a list of everyone
Add a "Subject" on the bottom, or simply use a space in a page name like "foo bar", and a "breadcrumb" link for quick wheel and edge door (which should work as a shortcut quickly for non-wheels for non-CSS browsers)
Section based on categories
Show the "Subject" on the bottom, or simply use a space in a page name like "foo bar", and a "breadcrumb" link for quick wheel and edge door (which should work as a shortcut quickly for non-wheels for non-CSS browsers)
